441 000+

hectares
of land resources

321 000+

hectares
of arable land area

153 000+

tons
of storage volumes

5 000+

head
of cattle

Crop production

Priority activity of “Atameken-Agro” agricultural holding

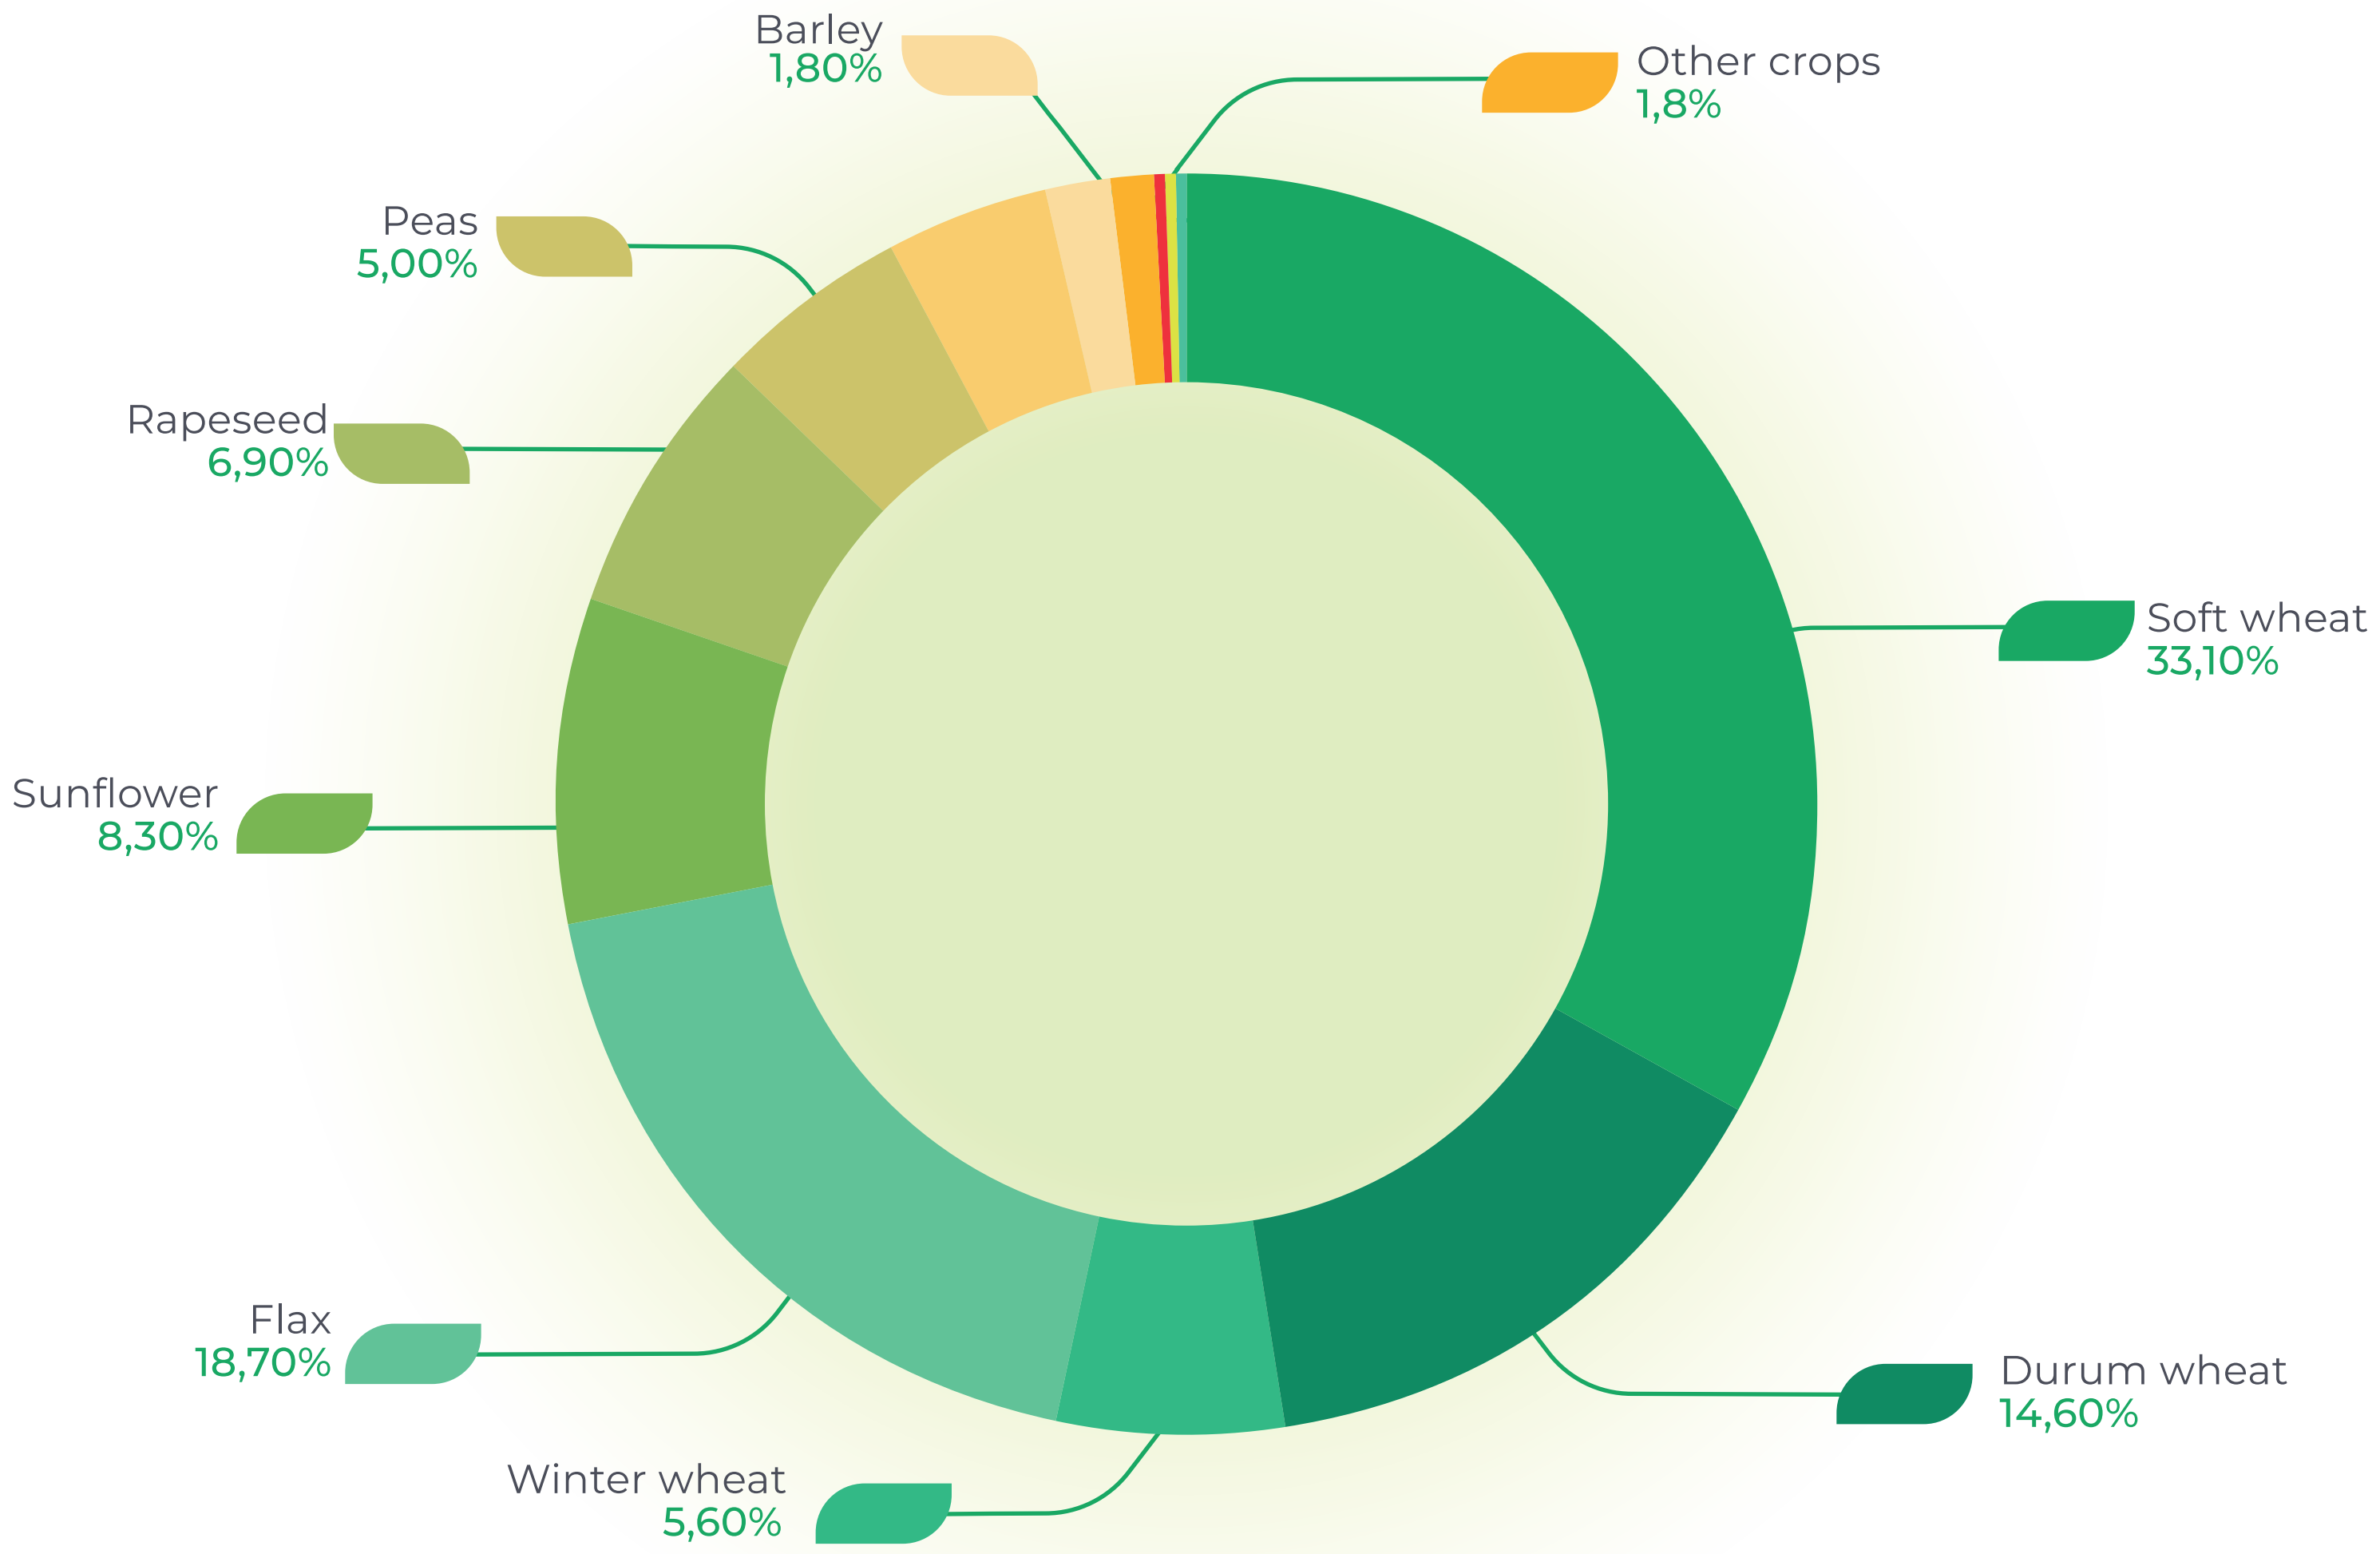

In 11 crop farms on the territory of more than 321 thousand hectares of fields we grow:

- cereals (wheat, rye, barley, oats, spelt)
- legumes (chickpeas, peas, green lentils, red lentils, soybeans)
- oilseeds (flax, rapeseed, sunflower, safflower).

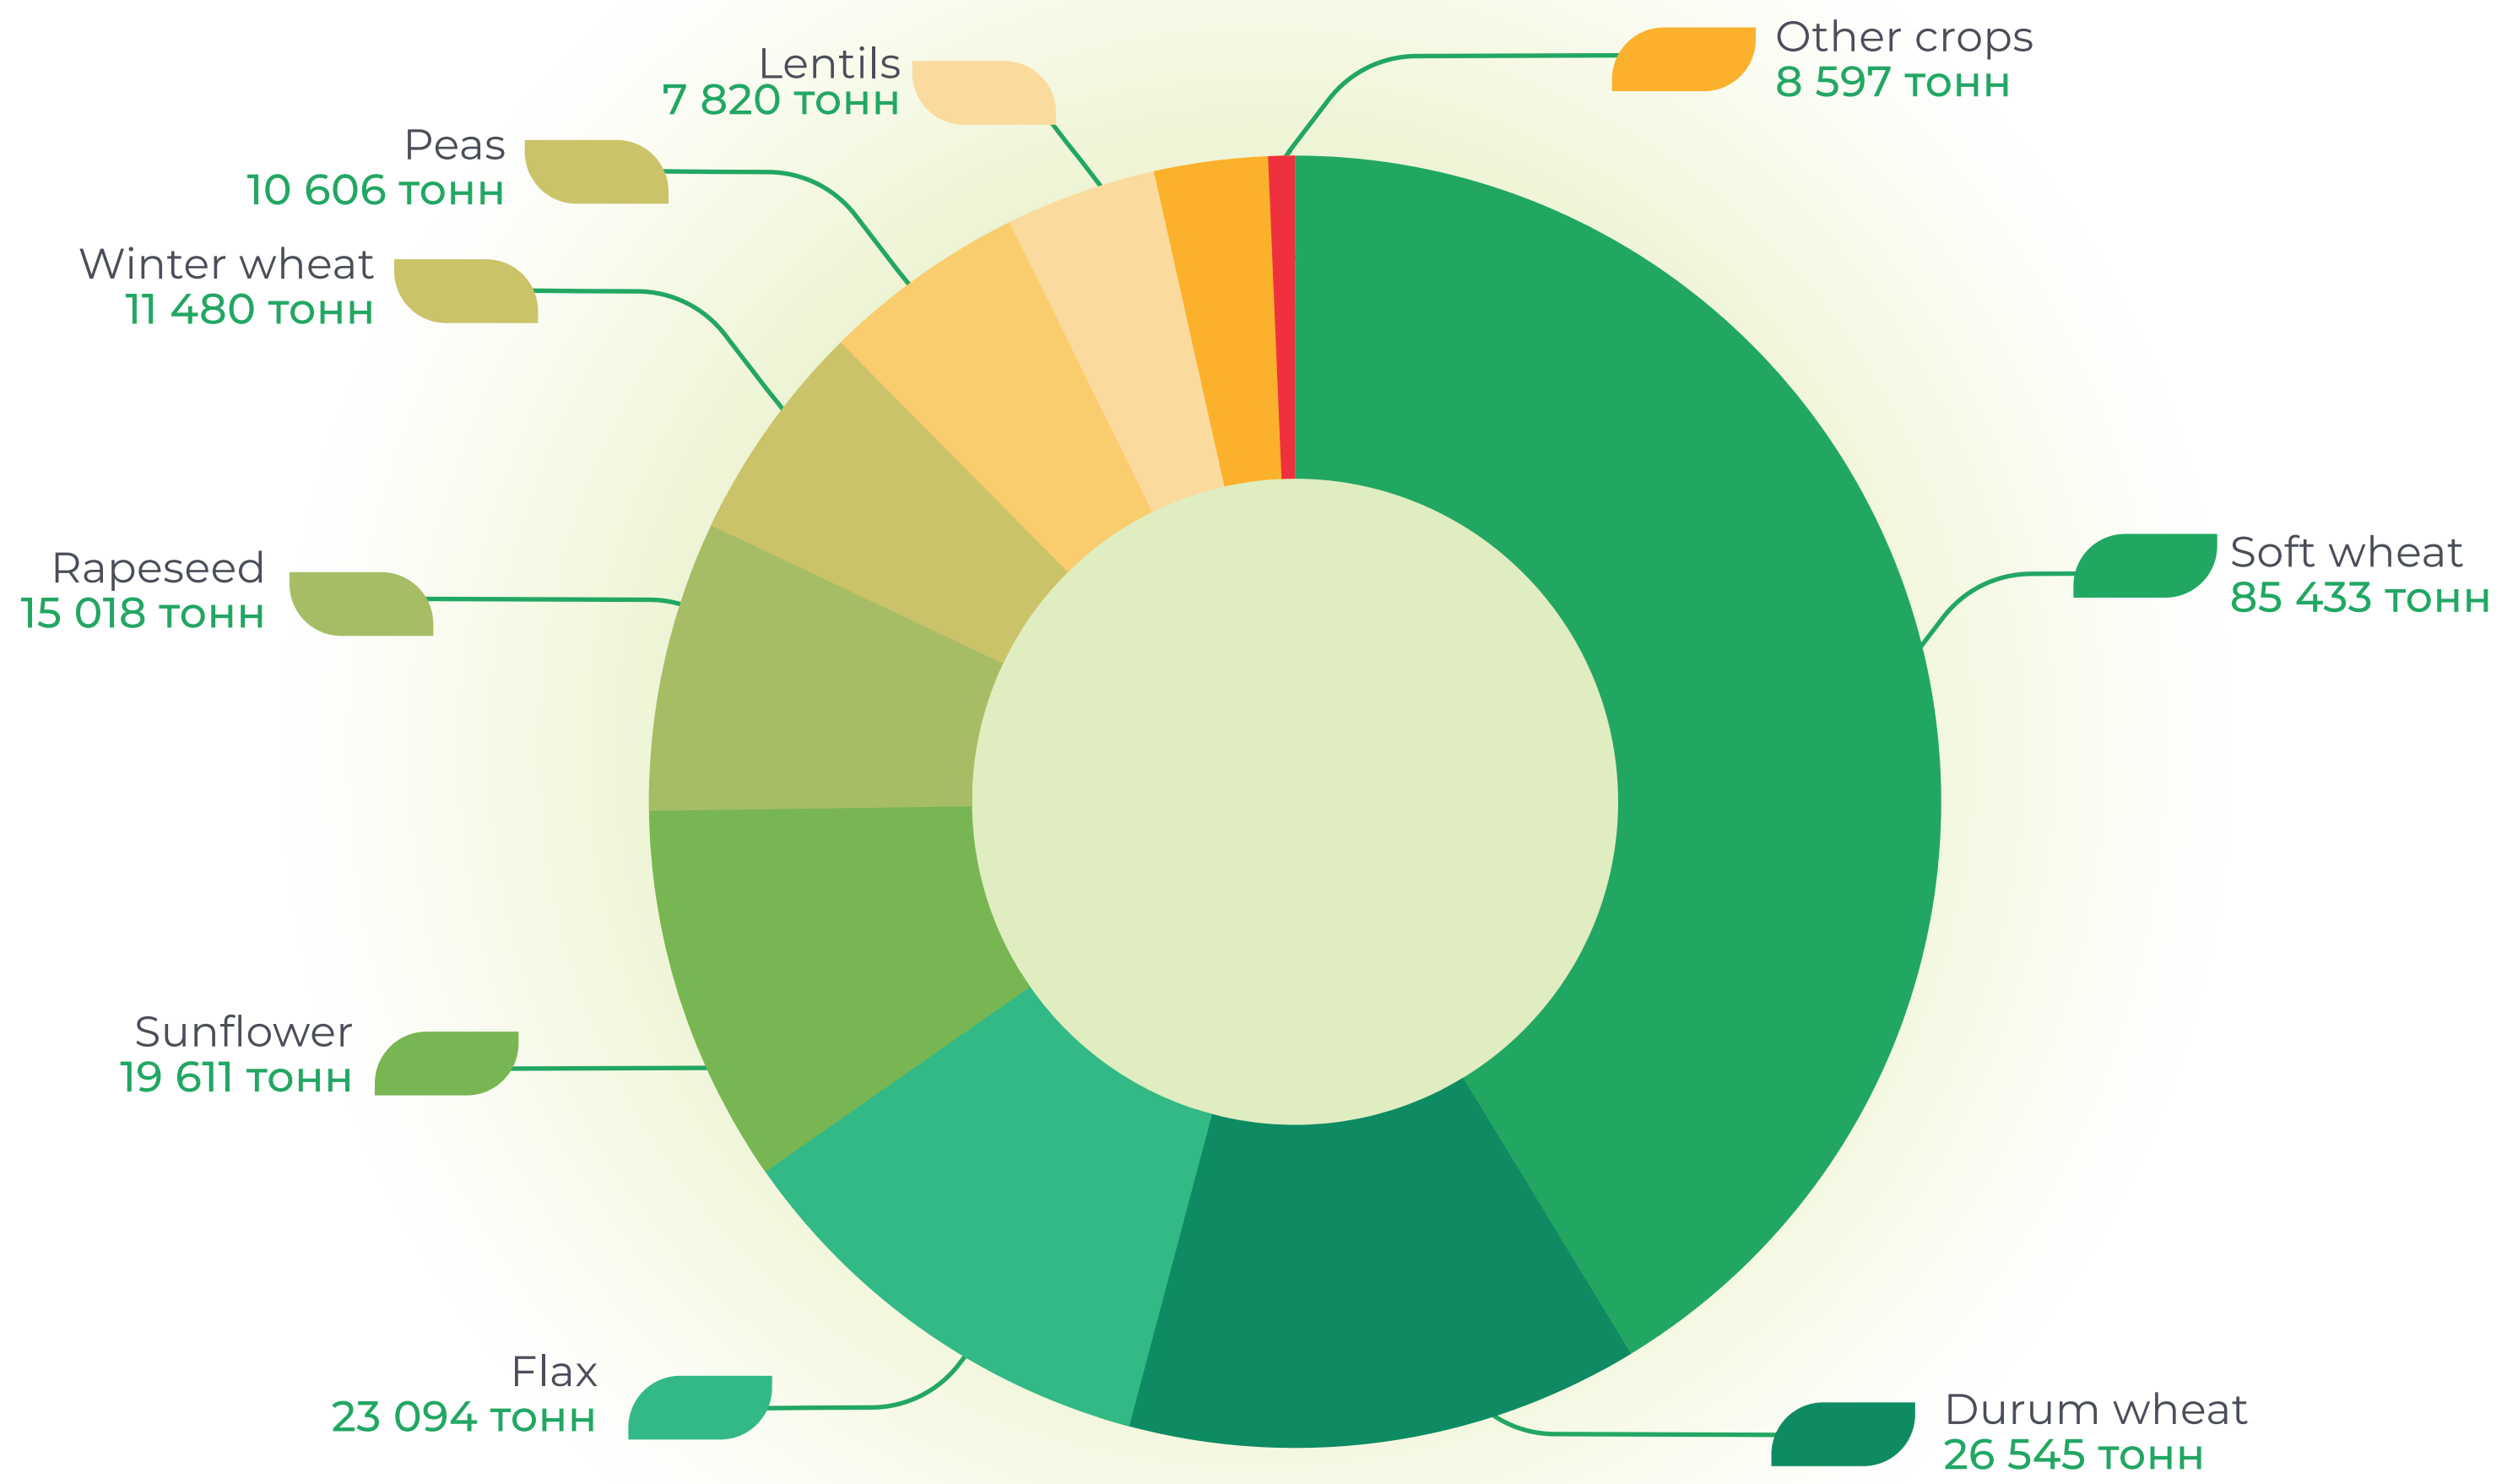

We are members of Global Pulse Confederation (GPC) and International Islamic Food Processing Association (IFPA).

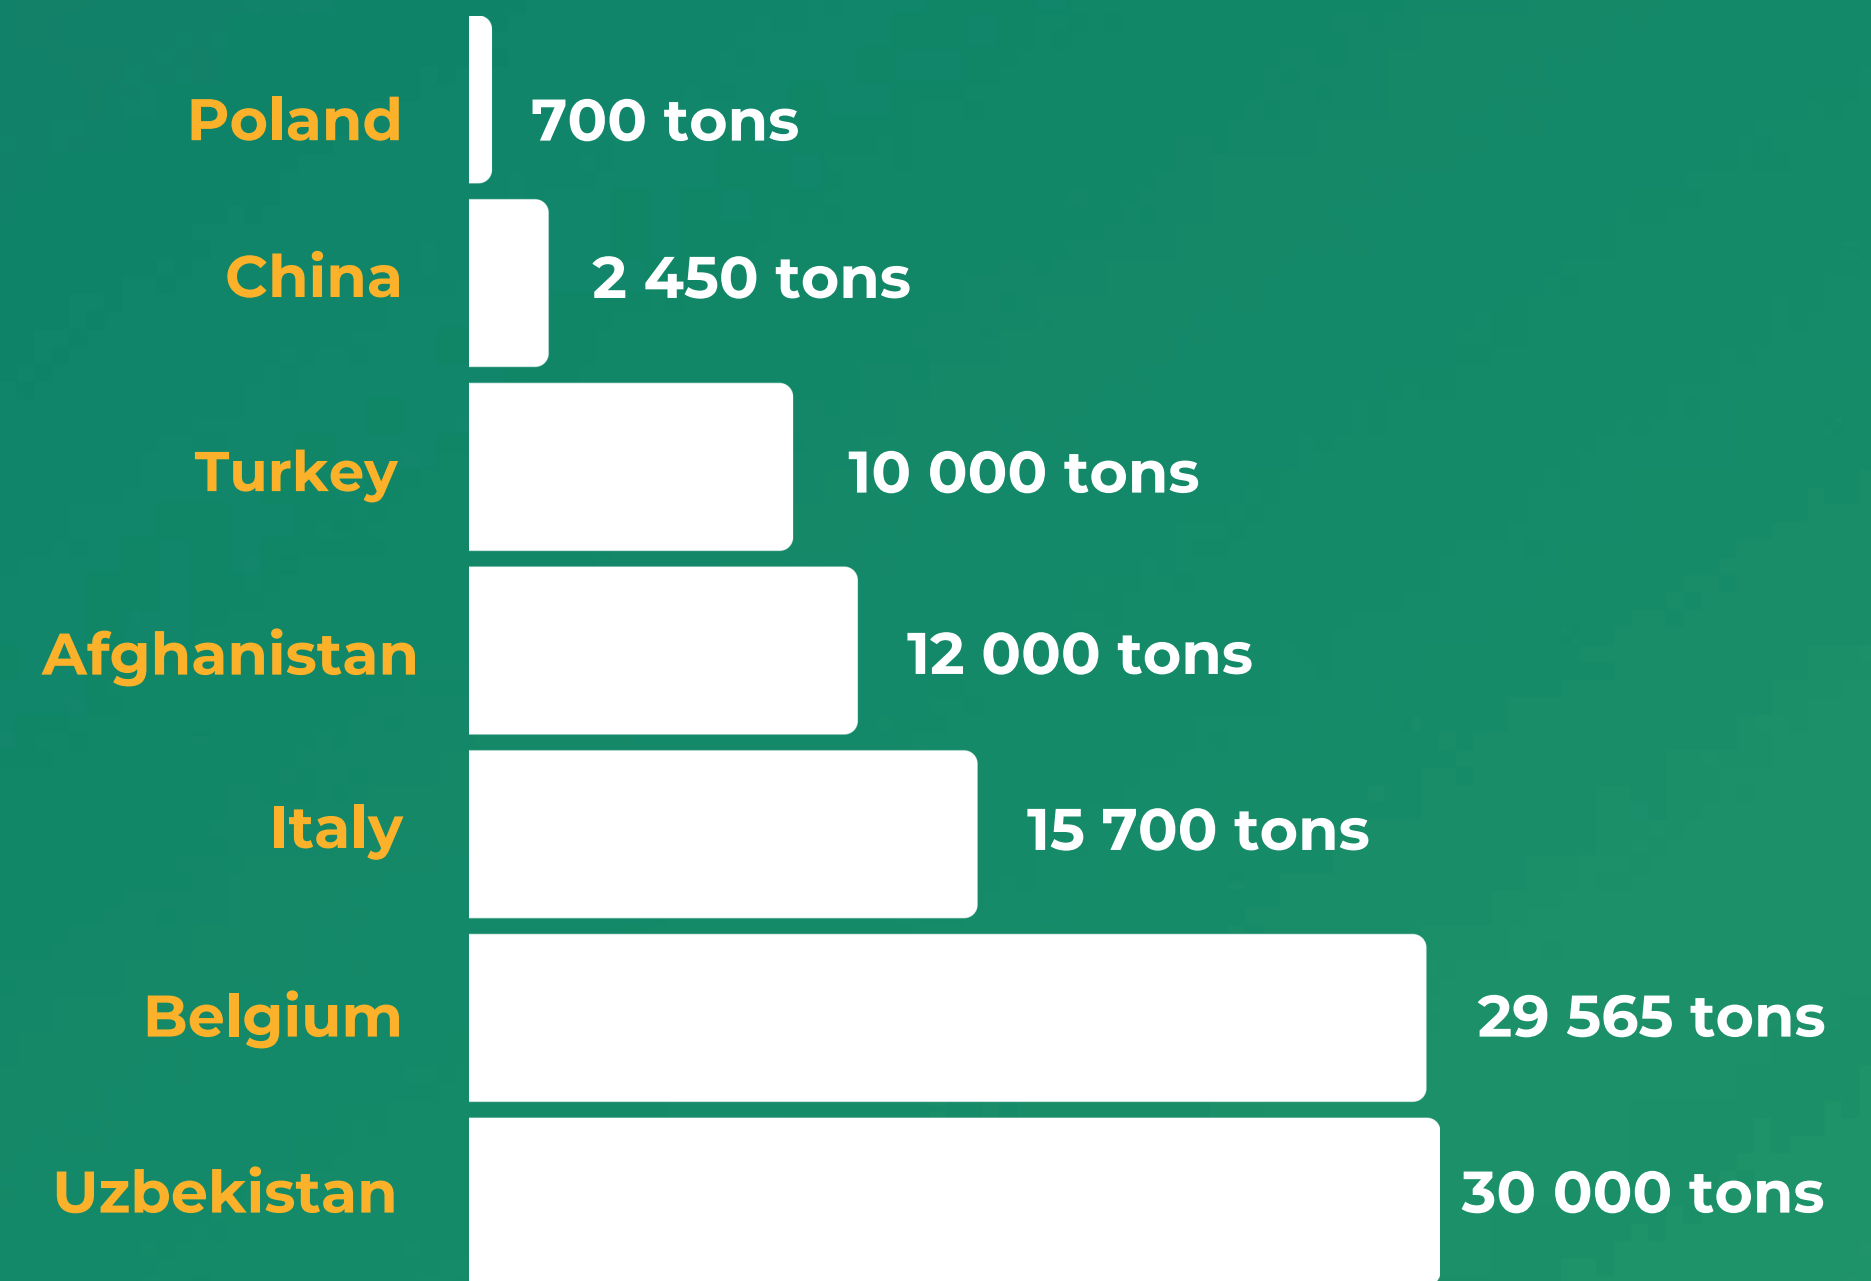

The ratio of crops relative to the total sowing

Gross harvest of products of JSC "Atameken-Agro", harvest 2021

Export harvest volume in 2020

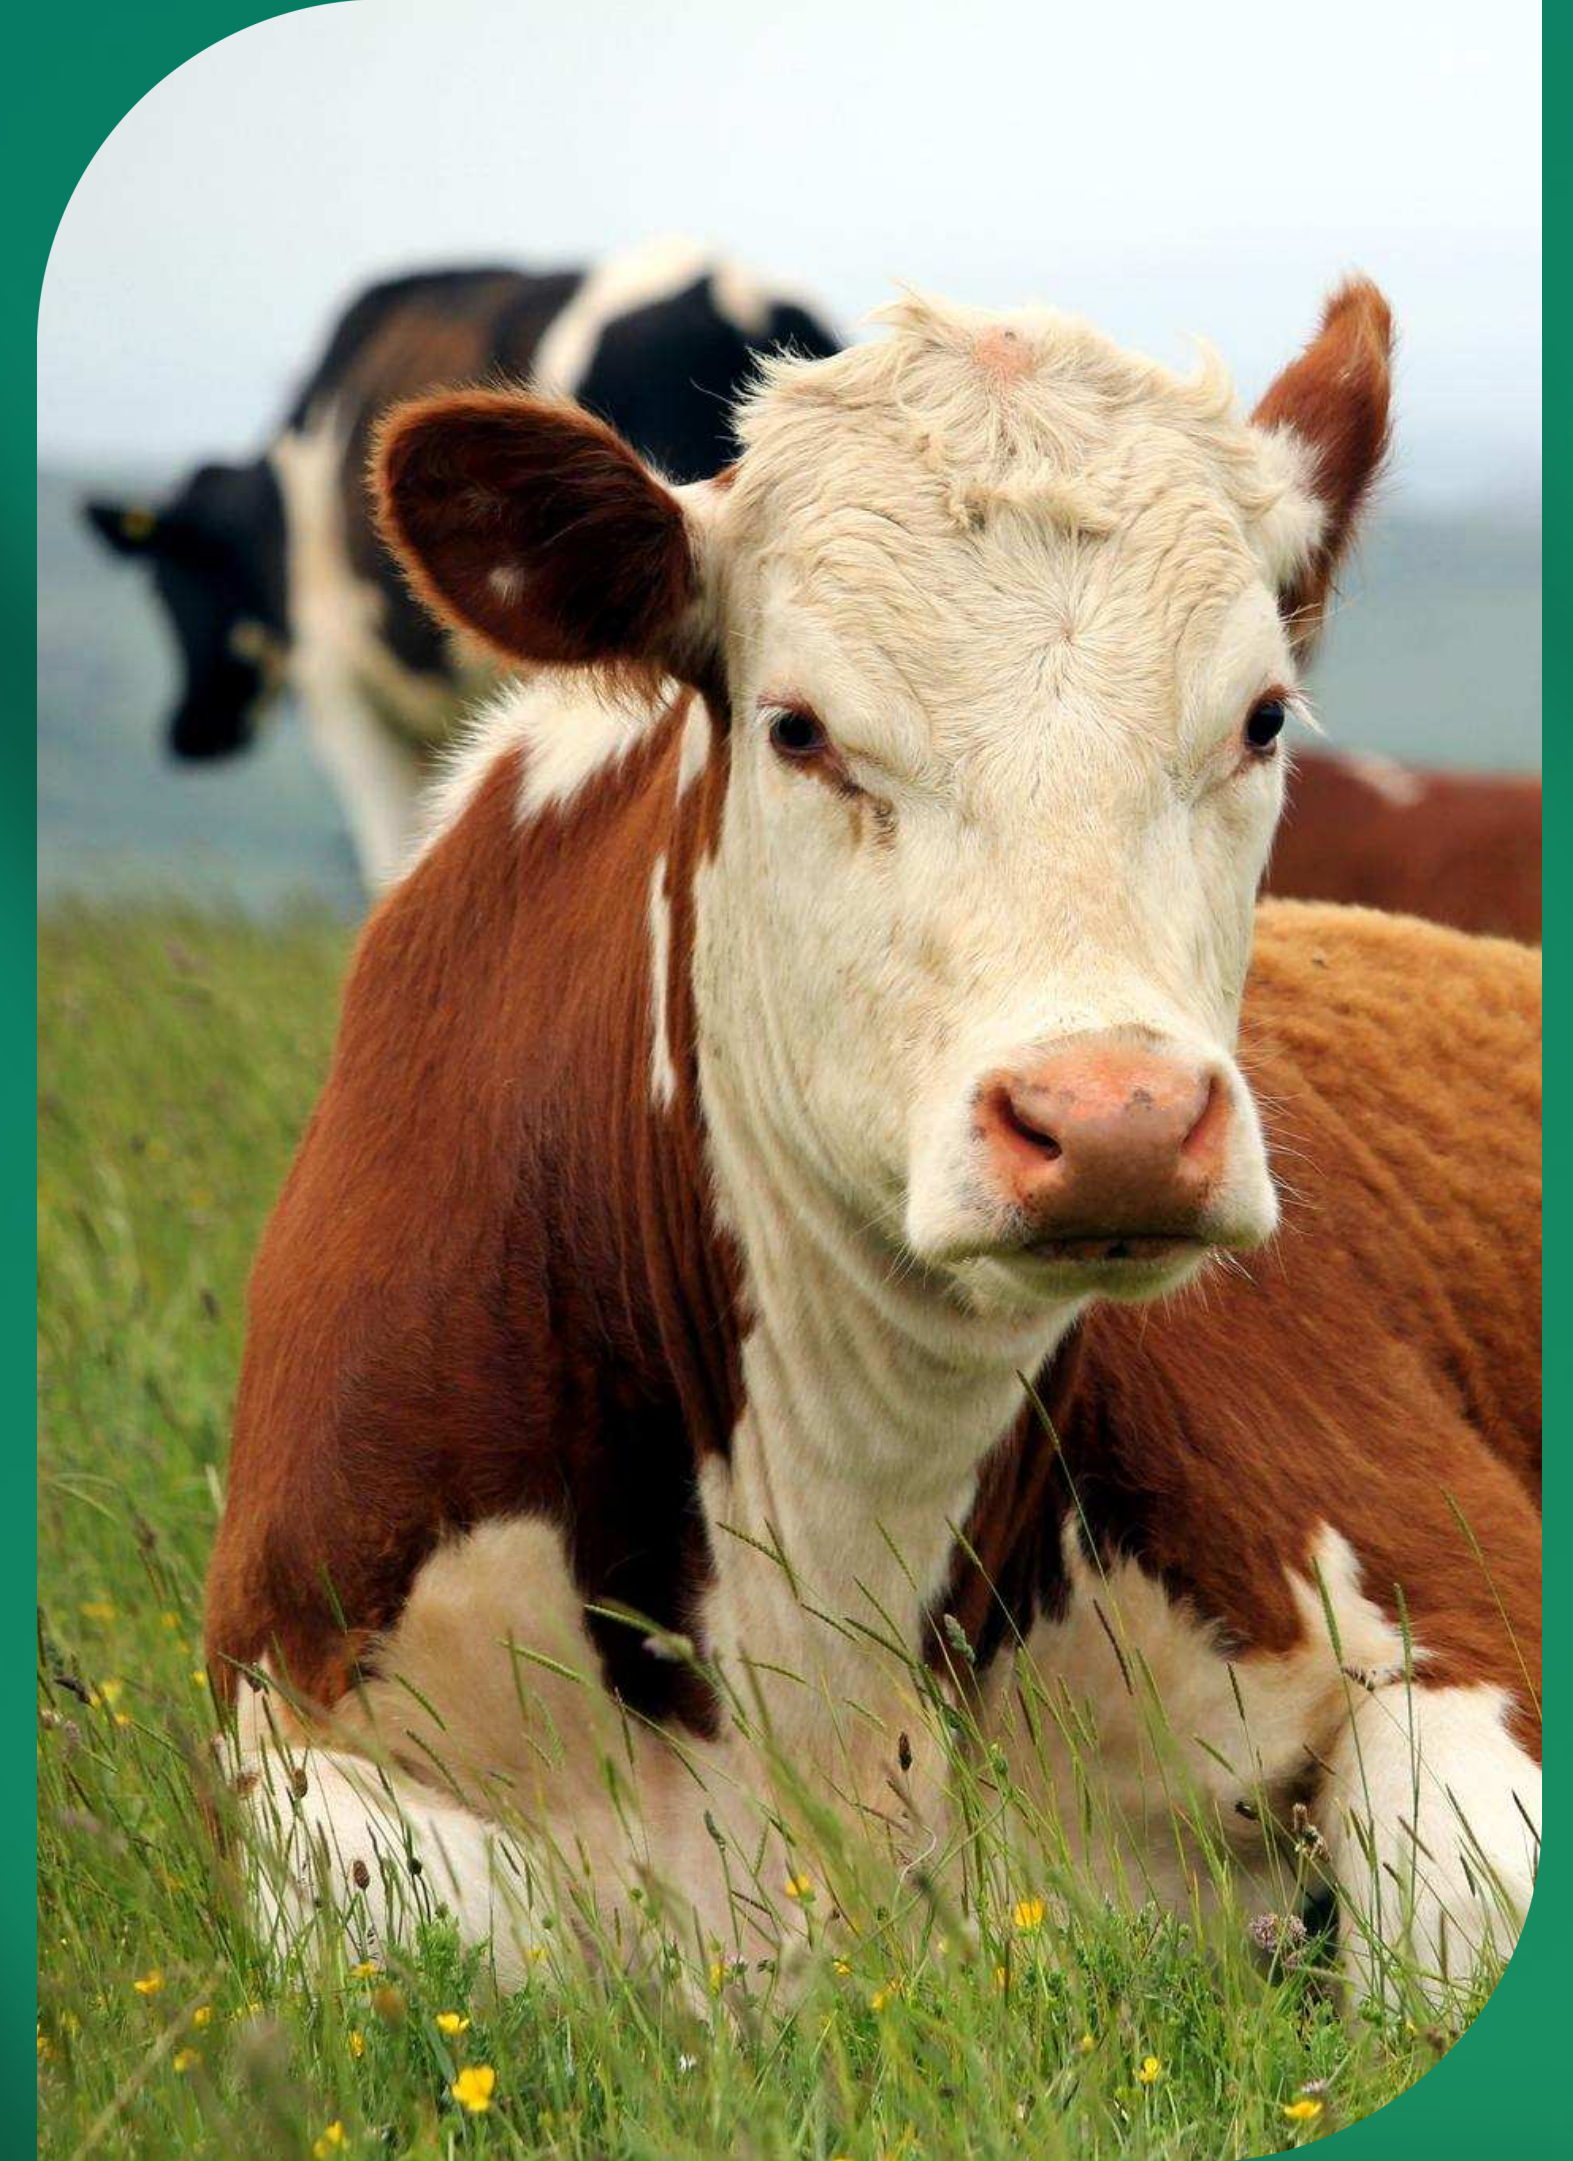

Animal husbandry

Since 2012, "Atameken-Agro" JSC has been breeding beef cattle.

8 farms of the agricultural holding contain a total of 5,000 Hereford and Aberdeen Angus heads.

Achievements of animal husbandry of the agroholding:

- a reliable supplier to the domestic market and neighboring countries
- feed of its own production
- advanced technologies (artificial insemination, widespread digitalization, strict veterinary control)
- annual awards in the category "best representative of the breed"

Seed production

The agricultural holding includes 2 seed farms and a plant for the production of seeds.

The plant operates on a gentle fractional patented technology of grain purification and the production of “strong” seeds, which allow:

- reduce the sowing rate
- ensure accurate seeding and simultaneous ripening
- increase yield by 20%

Capacity of the new plant: 4-5 tons/hour and 160 tons/day

At the moment, seeds of soft wheat, durum wheat and flax are available for sale, peas and lentils are planned for the future.

Grain elevators

In 2 companies of the agricultural holding, 5 grain elevators provide services for the storage and cleaning of large batches of agricultural products. The advantage of our elevators is direct access to railway and automobile entrances.

The total capacity of one-time storage is 153 000 tons

Elevators carry out:

- loading, drying, cleaning
- quality improvement and commodity condition
- storage and shipment
- of cereals, legumes and oilseeds.

The storage of crops in grain elevators is a guarantee of the preservation of their quality indicators.
